Y-Que T Shirt Superstore The place to buy t-shirts on the interweb. Wholesale T-shirt Printing

Tee Shirt Custom T-shirt Screen Printing Price Guide - As low as \$0.50/ea

Scroll Down this page to see the Pricing Chart.

Follow the instructions below or just stare at the price grid for a long time and eventually it will start to make sense after your eyes adjust. The printing prices are on the left and the shirt prices are on the right. Add them up to get your total. You can mix and match sizes to make your total order. You can also mix brands and colors as long as the total quantity of shirts reaches the minimum for that level.

As an alternative to the intimidating spreadsheet shown below, we have also provided you with this handy dandy pull-down menu for your bowing convenience. Estimate how many shirts are in your total order, then use this pull down menu to begin.

Shopping Cart Technical Note: When ordering you have to order each size separately in the shopping cart, then enter the "Order" button. Use the "Back" button to order different sizes, colors or brands until you complete your order. You can also order blank t-shirts without printing.

Estimate how many shirts are in your total order, then use this pull down menu to begin. Or you can get a quick estimate by scrolling down and reviewing the pricing grid.

Choose Quantity Level

Printing: Lookup the price of the printing based on the number of colors in your design. The first column is for one-color one-side. The second column is for two-colors one-side and so on. For printing on the other side, just double the print price.

T-shirts: Click on the "Level (0-14)" on the left or the shirt to see many of the shirts priced at that level. Click on any "Brand" on the right to get more details on that type of shirt. Email and questions to admin@yque.com or call 213-910-1501.

Shirt deposit required on all jobs. 1-2 week turnaround.

Ordering blank shirts, mixing brands, styles, colors and sizes is OK. XXL's cost more. n/a means not available at that quantity.

Wholesale T-shirt Printing Prices - Just add the cost of the shirt!

- 1) Shirt Level: First, Pick a level based on the estimated total quantity of shirts for your order by deciding on how many pieces you think you want to print? Then select the appropriate level for your job Levels (0-14)
- 2)Artwork: Determine the number of colors in your design. Each color requires a separate print and a screen. Find the printing cost based on the number of colors in your design. At 24pcs you get the first screen free. Each additional screen will cost \$30. At 300pcs you get up to 4 screens free. For more information on the available shirt styles just click on the Qty Level link on the left or on the brands of shirts are on the right hand side of the screen.
- 3)Quote: Add the cost of the shirts to the cost of the printing and you have your per piece quote. For more information on the available shirt styles just click on the Qty Level link on the left or on the brands of shirts are on the right hand side of the screen. The lower prices are for white shirts and the higher prices are for color shirts. You can mix and match shirt colors, sizes, brands and styles as long as they total the number for the level you picked. Feel free to call us at: 213-910-1501 or email your artwork to: admin@yque.com
